

The Ad Doctor Platform - Concept Note

Overview

The Ad Doctor is a **campaign decision and booking dashboard** that enables brands to **track performance, choose the right ad format, secure premium visibility slots, and execute campaigns seamlessly**.

This is not a content publishing platform. It is a **structured system for planning, buying, and optimising ad visibility**.

The Core Philosophy

Traditional advertising flow:

- Run campaign → Then analyse performance

The Ad Doctor flips this:

- Track performance → Decide format → Book slot → Execute → Optimise

Brands start with **clarity**, not guesswork.

What the Platform Solves

Brands today face:

- Uncertainty in format selection
- Lack of transparency in visibility
- Delayed performance insights
- Manual coordination for placements

The Ad Doctor solves this through:

- **Performance Data + Format Packaging + Limited Inventory + Instant Execution**
-

How the Platform Works

1. Performance-First Dashboard (Entry Point)

Every journey begins with insights.

Brands can view:

- Format-wise performance (carousel, reels, topical)
- Slot-level engagement benchmarks
- Real-time visibility trends
- Demand signals (fastest booked slots)

This ensures: **Better decisions before spending.**

2. Format-Based Campaign Options

Brands choose formats based on campaign goals:

- **Carousel (Images Only)** — up to 10 slides
- **Carousel (Images + Video)** — mixed media storytelling
- **Reel – Reshare** — amplification of existing content
- **Reel – Produced Content** — end-to-end video creation + featuring
- **Moment / Topical Feature** — single-slide inclusion in integrated carousel

Each format is **standardised, comparable, and performance-backed.**

3. Credit-Based System (30-Day Cycle)

Brands purchase monthly packages and receive credits.

- Credits act as **spend units across formats and slots**
- Every format + placement has a fixed credit cost
- Credits are valid for **30 days (no rollover)**

This ensures:

- Faster decision-making
 - Higher usage velocity
 - Predictable campaign cycles
-

4. Pricing Structure (Revenue-Aligned Model)

Monthly Credit Packages (Approx)

- **Starter Pack - ₹7,500 - 60 Credits**
 - **Growth Pack (Most Popular) - ₹15,000 - 150 Credits**
 - **Scale Pack - ₹30,000 - 320 Credits**
 - **Power Pack - ₹60,000 - 700 Credits**
-

5. Credit Consumption (Per Campaign)

Carousel (Images Only)

- Standard: 25 credits
 - Prime Slot: 35 credits
-

Carousel (Images + Video)

- Standard: 30 credits
 - Prime Slot: 45 credits
-

Reel – Reshare

- Standard: 30 credits
 - Prime Slot: 45 credits
-

Reel – Produced Content (Hero Product)

- Standard: 70 credits
 - Prime Slot: 90–110 credits
-

Moment / Topical Feature

- Standard: 15 credits
 - Prime Slot: 20 credits
-

6. Slot & Time-Based Inventory (Scarcity Engine)

Inventory is intentionally limited to maintain premium value.

Weekly Slot Limits

- Carousel: 5 slots
- Reels: 5 slots
- Moment: 4 slots

Booking Windows

- Open only **3 days per week**

This creates:

- Urgency
 - Higher demand concentration
 - Faster credit utilisation
-

7. Smart Booking Interface

Inside the dashboard, brands can:

- View **live slot availability**
- Compare format performance
- Check credit cost instantly
- Book placements in one click

No manual intervention. No dependency.

8. Seamless Execution

- Upload creatives
 - Confirm slot
 - Credits auto-deducted
 - Campaign goes live as scheduled
-

9. Real-Time Insights & Feedback Loop

Once live, brands track:

- Impressions
- Engagement metrics
- Slot-level performance
- Format-wise ROI

This feeds into: **Better decisions for the next 30-day cycle**

10. Brand Journey

Step 1: Understand

Analyse performance across formats

Step 2: Choose

Select format + package

Step 3: Book

Lock slots during limited windows

Step 4: Execute

Launch campaigns instantly

Step 5: Optimise

Track performance and refine strategy

11. Positioning

The Ad Doctor is not just a:

- A content platform
- A social feed

It is: **A visibility planning and execution engine for brands**

12. Why This Works

- Performance-first approach reduces risk
 - Format-based structure simplifies decisions
 - Credit system standardises buying
 - Limited inventory increases perceived value
 - Real-time insights improve outcomes
-

End Note

Brands don't struggle to create ads.

They struggle to **place them effectively and confidently.**

The Ad Doctor solves this by combining: **Clarity + Structure + Speed + Measurability**
